

Innovative and Collaborative Research Grants in Neuroscience 2023

Application Form

ICR ICR+

Please refer to the Call for Proposals for the eligibility criteria, and follow strictly this form for drafting your project; parts in red (including this one) can be deleted.

1. Project title

.....

Partner 1

Name
Position
Institution
Team
Address
Phone
Email

Partner 2

Name
Position
Institution
Team
Address
Phone
Email

Duplicate this table if necessary.

2. Project summary (max. 2 pages + 1 for references)

2.1. Background and rationale

Clearly define the project's scientific background, providing sufficient information and references to understand its rationale; describe the state-of-the-art approaches and knowledge; explain which knowledge is missing, and how the project will provide answers.

2.2. Objectives

Describe the project's objectives in relationship with the background and rationale; the objectives must be clearly defined, realistic and achievable in 1 year; if it is the case, specify here which new equipment and/or expertise is required to fulfill the project's objectives.

3. Innovation and novelty of this project (max. ½ page)

Explain why this project is novel/innovative and whether it would represent a scientific, technical and/or conceptual breakthrough.

4. Partnership (max. ½ page)

Explain whether and how Partners will bring complementary perspectives, expertise, equipment and/or resources.

5. Short CV of each Partner (max. 1 page per person)

6. Names of 2 national experts who could be contacted if needed for review (and who obviously have had no scientific link and common publications with project Partners or their teams in the last 5 years)

.....
.....

7. Names of experts to exclude from the reviewing process

.....
.....

8. General public summary

These summaries (in French and in English, **max. 10-15 lines each**) will be used for public communication. By participating to this call, the Applicant authorizes NeuroMarseille to use and publish these summaries.

PLUS PART if needed

9. Asset of the platform

Describe here what kind of new equipment is required by this platform. How this new equipment will help the project. How this new equipment will be useful for the whole neuroscientific community of NeuroMarseille.

10. Justification of the budget allocation

Detail how the funding obtained from NeuroMarseille will be used for this project.

The “ICR grant” envelop: up to 20 000€

Equipment = any expenses in excess of 800 € (or in excess of 400 € for computer expenses). In this category any piece of equipment: "kits" are not allowed even if their total cost exceeds 800€; they must be included in the Running costs part.

Description	Amount € HT
Total	

Running costs = all other expenses necessary for the research project implementation, including bonuses for students in internships if needed.

Description	Amount € HT
Total	

Partner 1: total amount in € = amount needed for running cost t in € = amount needed for equipment in € =

Partner 2: total amount in € = amount needed for running cost t in € = amount needed for equipment in € =

The “PLUS” envelop: up to 15 000€

New Equipment needed for the platform = expenses in excess of 800 € (or in excess of 400 € for computer expenses). Please provide quotations.

Be aware that the “Plus” part of the budget can not be used for consumable: this amount will be transferred directly to the designated platform in order, for the laboratory, to purchase directly this piece of equipment which will therefore enter the “inventory”.

Description	Amount € HT
Total
